

# TESTIMONIALS

The decision to be prepared for the unavoidable and inevitable disaster is an important one. It's an once-in-a-lifetime opportunity because once a disaster happens, it is too late; you must suffer through the rubble and aftermath. There are many reasons individuals and businesses want to be prepared, including protecting loved ones and personal possessions, as well as reducing injury, property loss and company downtime.

A few of our clients share their thoughts and stories with you.

## From Our Clients...

“On January 17th at 6:00am, I walked through my company's 500,000 square foot facility in Woodland Hills to access the damages. There were many computers, filing cabinets and bookcases everywhere and the building was in shambles. As I approached my department, I noticed all the computer equipment was intact. Everything that you fastened as a test held. It really worked!”

BILL WHINN, *Building/Facility Manager*  
The Prudential, Corporate Headquarters

“Thank you for the great job your company did on the CPR and First Aid Training Classes you taught here at Sebastian International. We now have a Safety Committee ready to handle a real emergency if the need ever arises.”

JANIS HEINZ, *Safety Committee Chairperson*  
Sebastian International

“My staff feels that they will be safer if an earthquake was to occur during school hours and that their rooms would not be disturbed to the same degree that they were in previous quakes. One teacher still keeps photos of her room after the last major earthquake and commented that she is really happy that we will be protected because of the Safe-T-Proof equipment now in place. Mr. Essrig, I don't meet people like you often. Thank you for your understanding, support and generosity while working with our school.”

KYLA HINSON, *Principal*  
Saticoy Elementary School – Los Angeles Unified School District

“Working within any hospital is very delicate work, and there can be absolutely no interruption to patient care or daily operations. Safe-T-Proof's professional and well-organized approach to the work made the projects progress smoothly as well as meeting the scheduled completion date.”

JOHN MENTZER, *Senior Project Manager*  
Centex Rodgers, Inc.

“I had my furniture fastened and purchased products from you before the quake. My neighbor's lost TVs, furniture, collectibles and artwork. We lost nothing. I got a lot of harassment from my friends about being overly prepared before the quake. Now, everyone is getting prepared.”

TARI WEISS, *Homeowner*

(more)

“I want to thank you for the exceptional job you and your company did for us. Safe-T-Proof brought to our attention the safety concerns that our facility was unprepared for when (not if) a disaster may occur. I appreciate the way your staff went about their work with care and professionalism. The work was done with very little interruption to our staff and the best part of all is you can hardly tell anything is fastened!”

MARY L. STRUETT, *Manager, Telecommunications and Administration*  
Fremont Investment & Loan

“We appreciate the rapid response and mobilization of your team and the sweeping effort you put out to accomplish our objectives for Great Western. Your team exemplified consistent proficiency and professionalism under difficult working conditions. You delivered a near-impossible task on time and on budget with no disturbance to the employees. All eleven buildings!”

CAROLYN JINKS  
Project Management Services

“Safe-T-Proof installed fasteners on all our computer equipment, FAX machines, typewriters and postage machine prior to the January 1994 earthquake. After, we surveyed our office for damage. We were happy to find that all of the equipment that was secured by Safe-T-Proof was intact and sustained no damage. Safe-t-Proof’s work saved this firm from suffering significant damage and replacement costs. “

LAURA STUART, *Administrator*  
Mazursky, Schwartz & Angelo: A Law Partnership
